### **W. P. Hickman Company Launches Quick Ship TerminEdge™ Program, Shipping Fascia System in 48 Hours**

(Asheville, NC) – The W. P. Hickman Company has announced a Quick Ship TerminEdge Program to ship its most popular fascias in 48 hours. This program responds to commercial roofing contractors' need for quick roof edge delivery. With product being shipped within 48 hours of being ordered, contractors can rapidly dry in the building which reduces weather exposure and minimizes moisture infiltration.

The Quick Ship TerminEdge Program features the Extruded TerminEdge Roof Edging manufactured by the W. P. Hickman Company. The fascia system is available in three standard face sizes: 3.75", 5.25", and 6.75" in 10 colors and finishes and are offered in 24 gauge Galvanized Steel, .040" Aluminum, and .050" Aluminum for orders up to 2000 linear feet. The fascia system includes welded retainer miters with folder covers if required, providing a complete roof edge system available in 48 hours. The available sizes are based on the number of nailers used and correspond to one, two, or three nailers of coverage.

The Quick Ship TerminEdge Program provides a speedy option for roofing contractors, in an industry that is driven by time constraints. It is comprised of a two-part assembly of an extruded retainer base and decorative snap-on fascia cover. The snap-on cover is a feature that was incorporated to also expedite installation and minimize labor costs. Extruded TerminEdge clamps roof membrane against a building like a termination bar preventing leaks and blow-offs. Two versions are available to be compatible with either Single-Ply roofs or BUR/Modified Bitumen roof systems. The roof edging is covered by W. P. Hickman Company's Category 5, 25-Year Warranty in wind conditions up to 155 mph. Extruded TerminEdge is certified ANSI/SPRI ES-1 tested as required by IBC, UL Classified, and carries a Florida Product Approval and Miami-Dade Approval, proving strong performance.

The W.P. Hickman Company is a family owned business with over 60 years of experience in the metal roof edging industry. Hickman products offer superior protection against wind and water infiltration and are backed by one of the best warranties in the business. W.P. Hickman, "The Leading Edge Since 1945." For more information on W.P. Hickman or any of its products visit its website at [www.wph.com](http://www.wph.com) or call 1.800.892.9173.
